

CreditBuddy

Borrow. Earn. Learn.

Build the Future.

A student-first financial ecosystem combining responsible credit, real earning, and financial learning.

Built by students. Guided by regulation. Designed for scale.

The Problem: Student Financial Instability

43M+ Students in India

Face financial instability during their college years

75%+ Face Regular Cash Gaps

Monthly shortfalls of ₹1k-₹10k driven by living expenses, emergencies, and career-related costs

✗ Earn

Limited access to safe, flexible earning opportunities. Unstructured part-time work and inconsistent income

✗ Learn

No financial literacy on budgeting, credit, or long-term money management. Students make financial decisions without guidance

✗ Borrow

Banks reject students due to lack of credit history

Existing apps charge high APRs and use coercive recovery practices

Why Existing Solutions Fail For Students

- Predatory lending (APR 70%+)
- Aggressive calls and harassment
- No income enablement pathways
- No financial education
- Loan-first, short-term financial thinking

Students don't need just loans – they need a fair financial ecosystem.

Our Solution: CreditBuddy

A unified student financial ecosystem built around Earn, Learn, and Borrow.

Safe, Instant Microloans (Borrow)

₹500-₹10,000 short-term credit with transparent pricing

Built for genuine student needs, not predatory lending

Flexible, Student-Aligned Repayment (Borrow)

20-30 day repayment cycles with extension options

Reduces stress and improves repayment outcomes

Repayment Discipline & Incentives (Borrow → Earn)

Non-cash benefits such as higher loan limits and fee reductions for timely repayment

Encourages responsible borrowing and reduces default risk

Purpose-Based Loans (Borrow + Learn)

Preferential terms for verified education and medical expenses

Ensures credit is used for high-impact needs

Earn & Learn Ecosystem (Earn + Learn)

Verified campus gigs and earning pathways

Paired with financial literacy tools to improve income stability and financial decision-making

CreditBuddy is designed as a long-term student financial ecosystem – not a loan-first app.

Market Opportunity

43M+ Students in India

Actively enrolled in higher education, facing recurring income gaps, learning needs, and short-term credit requirements

Target Segment: Students (18–25)

Digitally native, mobile-first users with:

- Frequent cash-flow mismatches
- Limited or no access to traditional credit
- Early need for income opportunities and financial guidance

Market Sizing (TAM–SAM–SOM)

TAM (Total Addressable Market)	SAM (Serviceable Addressable Market)	SOM (Serviceable Obtainable Market)
43M students • ₹1,20,000 Cr	25M students • ₹40,000 Cr	200K students • ₹400 Cr
All higher-education students in India with recurring financial needs.	Urban and semi-urban students seeking short-term credit, income pathways, and financial literacy support.	Campus-first rollout through selected colleges using ambassadors, partnerships, and referrals.

Why This Market Is Attractive

- High-frequency, repeat financial needs
- Early entry into the customer financial lifecycle
- Strong campus-driven and referral-led network effects
- Low brand loyalty to existing solutions

Beyond Lending

CreditBuddy captures value across:

- Borrow – short-term, responsible micro-credit
- Earn – verified gigs and income pathways
- Learn – financial literacy and money management tools

Together, these create a long-term student financial ecosystem.

Competition Analysis

Feature	mPokket	Slice	CreditBuddy
Pricing Model	High effective pricing	Variable, usage-based	✓ <i>Transparent, student-aligned</i>
Core User	General micro-credit users	Young professionals	✓ <i>Students (18-25), campus-first</i>
Product Focus	Loan-first	Credit-led lifestyle	✓ <i>Earn + Learn + Borrow</i>
Engagement Model	Standard fintech processes	Conventional collections	✓ <i>Support-led, student-safe</i>
Financial Literacy	Minimal	Limited	✓ <i>Built-in literacy tools</i>
Regulatory Structure	NBFC-partner-led	RBI-compliant structure	✓ <i>Fully compliant, NBFC-partner-led</i>

Purpose-built for students – not adapted from consumer fintech.

Validation & Early Traction

Early validation from students across multiple campuses (ages 18–24)

Face Regular Financial Challenges

Recurring short-term money gaps affect academics and daily life

Prefer RBI-Compliant Platforms

Trust regulatory-backed solutions over informal or unregulated credit options

Interested in Earn & Learn Opportunities

Seek income pathways combined with skill-building and financial guidance

"Finally, a platform that understands students and prioritizes trust."

– Student participant

"Learning how to manage money mattered as much as accessing credit."

– Student participant

Key Early Learnings:

- Strong appreciation for simple onboarding and transparent terms
- High interest in income-linked and learning features
- Early feedback highlighted UI and data-protection improvements

Insights gathered through structured student interviews and early product exploration.

How CreditBuddy Works

A simple, transparent flow designed for students — aligned with trust, compliance, and long-term financial stability.

Apply (Purpose-Based)

Students select loan purpose and amount through a simple, mobile-first interface built for college use cases.

Transparent Agreement

Clear RBI-compliant documentation with a plain-language summary of interest, fees, and repayment timelines.

Instant Disbursement (Post-Approval)

Funds are disbursed immediately upon approval with full transparency and no hidden charges.

Flexible Repayment

20-30 day repayment cycles with extension options designed to reduce stress and prevent defaults.

Responsible Usage Benefits

On-time repayment unlocks better terms, lower fees, and higher eligibility over time.

Earn & Learn Integration

Access to verified campus gigs and financial literacy tools to improve income stability and borrowing behaviour.

Delivered through campus partnerships and verified student networks.

CreditBuddy is built as a long-term student financial ecosystem – not a loan-first app.

Revenue Model

A lending-led model with ecosystem revenue layers — designed for sustainability, low student CAC, and long-term engagement.

Revenue Layers (Today → Scale → Long-Term)

Loan Interest

Transparent, student-aligned interest on short-term microloans.
Designed for high repayment discipline and regulatory compliance.

Ecosystem Revenue (Scaling Phase)

Gig Marketplace

Commission from connecting students to verified campus gigs and income opportunities.
Improves student income and repayment capacity, lowering credit risk.

Brand Partnerships

Targeted, opt-in partnerships with student-focused brands (education, productivity, lifestyle), monetized through contextual placement and offers.

Engagement & Retention Layer (Long-Term)

Premium Tools

Optional productivity and career tools (resume builder, study aids, document tools) that improve employability, income stability, and long-term retention.

Buddy Coins Ecosystem

A non-cash incentive layer that rewards responsible usage and repayment, driving engagement, retention, and cross-product adoption.

(Behavioral reinforcement layer – non-cash, compliance-safe incentives.)

Lending drives revenue; ecosystem layers improve LTV, retention, and unit economics – without increasing student cost burden.

Unit & Customer Economics (Modeled)

Unit Economics: ₹1,000 Loan | 30 Days

₹60 Interest Earned

Transparent monthly interest from student micro-loan

₹20 NBFC Partner Share

Capital, underwriting, and risk management

₹25 Technology & Operations

KYC, infrastructure, compliance, and support

₹15 Credit Loss Provision (1.5%)

Conservative default buffer

₹0–₹5 Net Contribution per Loan

Loans designed for access and engagement, not single-loan profit

Single-loan margins are intentionally thin; profitability improves through repeat usage and cross-product revenue.

Customer Economics

₹220

Gross CAC

Campus ambassadors, referrals, limited paid channels

<12

CAC Payback (months)

Early revenue offsets acquisition cost within the first year

~₹480

Annual Contribution per Student

Driven by non-loan revenue and repeat engagement

₹2.5K–₹3K

3-Year LTV

Sustained usage across loans, earn-and-learn, and partner ecosystem

11x–13x

LTV : CAC

Strong, scalable unit economics

CreditBuddy prioritizes student trust and adoption in early transactions, with margins expanding through ecosystem monetization and retention.

Risk Management

A prevention-first credit risk framework built for students, compliance, and long-term portfolio quality.

Gradual Credit Building

Small starting limits, increased only through on-time repayment.

Earn-to-Repay System

Verified gigs help students earn and repay on time.

Flexible Extensions

Pre-default extensions reduce stress and hard defaults.

Purpose Verification

Proof-based loans for education and medical needs.

Radical Transparency

Plain-language, RBI-aligned agreements. No hidden terms.

Risk is managed through behaviour-based incentives and early intervention mechanisms.

Go-To-Market Strategy

Campus-led growth with low CAC, trust-first distribution, and controlled credit risk

Phase 1: Campus Foundation (1k-10k students)

Controlled pilot & repayment validation

- Campus ambassadors + verified onboarding
- College & student-body tie-ups
- Repayment-linked referrals

Goal: Validate CAC, repayment discipline, and trust signals

Phase 2: Regional Expansion

Earn-to-repay driven organic growth

- Gig marketplace → higher income, better repayment
- Word-of-mouth from high-performing cohorts
- Regional college clusters

Goal: Scale with improving unit economics and lower default risk

Phase 3: Pan-India Scale

Demand-led national rollout

- Waitlist-based expansion to manage credit exposure
- Product-led Earn-Learn-Borrow loop
- Strategic partnerships (NBFCs, brands, institutions)

Goal: National presence with disciplined credit control

Growth is product-driven – distribution improves repayment, not just installs.

Driven by Students, Guided by Experts

Student-led execution, strengthened by experienced compliance, finance, and growth leadership.

Core Team

Hands-on team building and shipping the CreditBuddy MVP.

Debasish Mallick – Founder & CEO

Founder building a compliant, student-first credit ecosystem. Owns product vision, credit design, and regulatory alignment.

Goutam Bhosagar – Tech Lead

Leads fintech backend architecture, security, and scalable systems.

Ipsit Kumar Thakur – Tech Developer

Full-stack developer (mobile + backend). Focused on UX, reliability, and performance.

Extended Team (Support)

5 on-demand specialists supporting UI/UX, backend optimisation, content, and growth.

Advisory Board

Experienced operators ensuring regulatory safety, capital discipline, and scalable growth.

CS Susant Pradhan – Compliance Advisor

RBI compliance frameworks, governance structure, regulatory readiness.

CMA Vishal Pathak – Finance & Audit Advisor

Unit economics, audits, and financial control systems.

Karan Agrawal – Lending & NBFC Advisor

Lending structure, NBFC partnerships, and capital flow management.

Shekhar Kumar Padhy – GTM & Revenue Advisor

Go-to-market strategy, monetisation, and revenue scaling.

Ayush Nanda – Business Advisor

Fundraising guidance and national expansion strategy.

Founder-led execution, with governance, compliance, and scale guided by experienced operators.

Vision & Long-Term Impact

Building financially confident students and a responsible student credit ecosystem.

Financial Literacy

Equipping students with practical financial knowledge for long-term independence.

Gamified Responsibility

Encouraging disciplined financial behavior through incentives and Buddy Coins.

Diverse Earning Opportunities

Unlocking income via gigs, referrals, rewards, and skill-based work.

Long-Term Credit Health

Helping students build strong credit histories that unlock future opportunities.

Borrow → Earn → Learn

Future-ready students. Responsible credit. Scaled impact.

Investment Opportunity

We are raising a seed round to scale CreditBuddy's compliant, campus-led student credit platform across India.

Guidance & Mentorship

Fintech, NBFC, and regulatory guidance to build a compliant, scalable student lending platform.

Strategic Partnerships

Access to NBFCs, lenders, and financial institutions to power lending partnerships at scale.

Scaling Support

Capital and operational support to expand campus-led distribution and controlled credit rollout.

Ideal investors: Angels, early-stage funds, and operators who can add value through fintech, lending, or regulatory expertise.

Stage: Seed | **Raise:** ₹1.5-2 Cr

Use of capital: Compliance readiness, product hardening, campus pilots, and controlled geographic expansion.

Join us in building India's most trusted, compliant, student-first credit ecosystem – responsibly and at scale.

Together, we can responsibly unlock financial access for India's 43+ million students.

Thank You

Together, we are building a responsible, student-first financial future for India.
